Introduction

This document is the final deliverable for the Enterprise Service Bus (ESB) platform deliverable Requirements Definition (SIPTL7). This document captures the requirements that will be gathered for implementing the ESB platform, to date. These requirements include business requirements, functional requirements, and non-functional requirements. As requirements are developed, they will be uploaded to Jama for approval. The approved requirements will be exported from Jama and uploaded to SharePoint. The requirements deliverable will include links to the SharePoint site.

1.1 Overview

The New Mexico Human Services Department (NM HSD) has adopted the Health and Human Services (HHS) 2020 vision, a transformational, enterprise approach to the health and human services business. HHS 2020 will move service delivery from a program-centric approach to a stakeholder-centric approach. HSD will migrate away from program and technology silos into an integrated, flexible framework that supports service delivery and stakeholder interaction across HHS programs and organizations. HHS 2020 is technology-enabled, but includes rethinking organizational design, redesigning and streamlining business processes and reducing barriers between organizations within the HHS enterprise.

Please see “Section 1.1: Overview” in the Project Management Plan (PMP) for a detailed MMISR project overview.

1.2 Purpose

The purpose of this document is to present the requirements collected for the ESB platform. This deliverable lists the business requirements, functional requirements, and non-functional requirements elicited, thus far, for this integration.

1.3 Document Management

This subsection describes how the System Integrator (SI) Contractor team will maintain and update this document throughout the contract life cycle, as well as the method for obtaining approval from NM HSD for updates to the document.

1.4 Intended Audience

The intended audience for this document includes business, technical, governance, nodule contractors, and project management stakeholders. Specific stakeholders include software or system developers and testers supporting the NM HHS 2020 effort. Additionally, the audience consists of the appropriate SI Contractor personnel and the NM HSD team stakeholders.

1.5 Stakeholders

The following table lists the teams involved in developing, validating, updating, and approving the Requirements Definition – ESB (SIPTL7) deliverable, along with their respective roles and responsibilities.

Table 1: Roles and Stakeholders

Role	Responsibility	Task/Activity	Identified Resource(s)
Business Owners (BOs)/ Subject Matter Experts (SMEs)	- Collaborate with the SI Contractor to plan Joint Application Requirements (JAR) sessions. - Coordinate SME participation in JARs. - Confirm BO/SME final requirements acceptance. - Approve final requirements.	Pre-JAR - Review material and questions sent prior to the JAR sessions, in an agreed-upon timeframe; come prepared. JAR Participation - Validate draft material presented during JAR. Post-JAR - Review and approve updated materials and requirements sent after the JAR. - Follow up on action items. - Respond to follow-up emails. - Participate in any follow-up meetings.	Audrey Abeyta – HHS 2020 Non-Tech Lead Wes Sanford – ESB Owner John Oliver – ESB Back-up Karmela Martinez – ASPEN IT Owner Liz Weil – Infrastructure, HHS 2020 Non-Tech Lead Dan Valdez – Security James Lilly – Project Director Kristie Abraham – MAD Brian Salter – Unified Portal SME Karin Stevenson – Unified Portal SME Daniel Dominguez – Unified Portal SME Kamon Gregg – Unified Portal SME Stacey Camp – IV&V
SI Contractor Team	Contribute to or lead ESB JAR sessions, communicating with Architecture Review Board (ARB), BOs, and SMEs.	- Create final ESB deliverable for review and approval. - Follow up on action items to ensure they are addressed.	Fayaz Syed – Principal Software Engineer Ashish Kumar – Pradeep Thopae – Anjanette Keane-Dawes – Implementation Manager ESB Satya Govindu- Sivakumar Rajmohan – Suzanna Yourishin – Business Analyst

Role	Responsibility	Task/Activity	Identified Resource(s)
NM HSD ARB	Provide approval of intermittent deliverables, working with SI Contractor to resolve outstanding issues.	- Approve requirements in Jama. - Approve intermittent deliverables. - Facilitate the resolution of outstanding items.	
SI Certification Manager	Manage SI Certification Activities	- Coordinate certification activities among the NM HSD Certification team, SI Certification team NM HSD teams, and module contractor teams. - Provide guidance and directions to SI Teams to ensure accurate completion of Medicaid Enterprise Certification Toolkit (MECT) Checklists. - Verify that module contractor certification evidence is tracked and managed and made available for State and Independent Verification and Validation (IV&V) reviews in accordance with the Centers for Medicare and Medicaid Services (CMS) guidance.	Robert Milk – Certification Manager

Role	Responsibility	Task/Activity	Identified Resource(s)
		- Identify MECT Checklist items not met and work with NM HSD Certification team, SI team, and module vendor teams as appropriate to resolve. - Assist NM HSD Certification Team in preparation for all Medicaid Enterprise Certification Life Cycle (MECL) reviews. - Observe, comment, and answer questions during the formal CMS MECL reviews (R1, R2, and R3) and additional CMS-required reviews.	
NM HSD Certification Manager	Manage and coordinate certification activities among NM HSD, CMS, IV&V, SI, and all module contractors.	- Coordinate review of the deliverables and associated artifacts. Manage issue resolution for requirements and system review criteria (SRC) that are not met. - Manage the Checklist Evidence Folder to ensure its accuracy. - Schedule, lead, organize, and respond to CMS during the formal MECL reviews (R1, R2, and R3) and	Jennifer Galvez – Certification Manager

Role	Responsibility	Task/Activity	Identified Resource(s)
		other CMS-required reviews.	

2. Business Requirements and Business Rules

2.1 Business Requirements

The business requirements elicited for ESB, thus far, have been uploaded to Jama. These requirements have also been extracted and uploaded to SharePoint. As additional requirements are collected, they will be uploaded accordingly.

<Insert SharePoint site link>

2.2 Business Rules

The business rules elicited for ESB, thus far, have been uploaded to Jama. These rules have also been extracted and uploaded to SharePoint. As additional business rules are collected, they will be uploaded accordingly.

<Insert SharePoint site link>

3. Functional and Non-Functional Requirements

3.1 Functional Requirements

The functional requirements elicited for ESB, thus far, have been uploaded to Jama. These requirements have also been extracted and uploaded to SharePoint. As additional requirements are collected, they will be uploaded accordingly.

<Insert SharePoint site link>

3.2 Non-Functional Requirements

The non-functional requirements elicited for ESB, thus far, have been uploaded to Jama. These requirements have also been extracted and uploaded to SharePoint. As additional requirements are collected, they will be uploaded accordingly.

4. Assumptions / Constraints / Risks

4.1 Assumptions

The following assumptions exist for developing this SIPLT7 deliverable:

4.2 Constraints

The following constraints exist for this SIPLT7 deliverable:

- System integrations will depend on technology, existing organizational frameworks, standards, and existing architectures.
- Business policies that also drive data architecture design include internal organizational policies, rules of regulatory bodies, professional standards, and applicable governmental laws that can vary by applicable agency. These items and rules will describe the manner in which the enterprise needs to process its data.

4.3 Risks

The following risks exist for this SIPLT7 deliverable:

5. CMS Certification

This section describes the approach to certification for the Requirements Definition – ESB (SIPLT7) document. The documented processes are followed, and any changes to the configuration will be recorded and tracked throughout the entire project life cycle. CMS will review the Requirements Definition – ESB (SIPLT7) document during the following MECL reviews:

- R2, Operational Milestone Review
- R3, MMIS Certification Final Review

CMS may also review the Requirements Definition – ESB (SIPLT7) document during informal reviews.

The Certification Process Guide contains detailed information about the MMIS Certification approach.

Appendix D: MECT Checklist contains the MECT Checklists items attributable to ESB.

6. Requirements Traceability

This deliverable meets the following requirements:

Statement of Work (SOW): Deliverable 44.

Task Item: 44.1 Requirements Definition – ESB and Orchestration Components of the Platform

Sub-Tasks: 44.1.1 Requirements Definition – ESB and Orchestration Components of the Platform

7. Appendices

7.1 Appendix A: Deliverable Record of Changes

Changes to this deliverable after initial approval will follow the accepted change management process documented in the PMP and will be recorded in the revision history maintained in Appendix A: Record of Changes in this document.

Table 2: Deliverable Record of Changes

Version Number	Date	Author/Owner	Description of Change
v0.1	10/30/18	Suzanna Yourishin	Original creation
V0.2	11/26/18	Internal TPGSI review	Edits to original

7.2 Appendix B: List of Acronyms

The following is a list of all acronyms used in this document.

Table 3: List of Acronyms

Acronym	Definition
ARB	Architecture Review Board
ASPEN	Automated System Program and Eligibility Network
BO	Business Owner
CAQH	
CMS	Centers for Medicare and Medicaid Services
CORE	
ESB	Enterprise Service Bus
HHS	Department of Health and Human Services
HIPAA	Health Insurance Portability and Accountability Act
HSD	Human Services Department
IT	Information Technology
IV&V	Independent Verification and Validation
JAR	Joint Application Requirement
MAD	Medical Assistance Division

Acronym	Definition
MECL	Medicaid Enterprise Certification Lifecycle
MECT	Medicaid Enterprise Certification Toolkit
MITA	Medicaid Information Technology Architecture
MMIS	Medicaid Management Information System
MMISR	Medicaid Management Information System Replacement
NM	New Mexico
PMP	Project Management Plan
SI	System Integrator
SMA	
SME	Subject Matter Expert
SOW	Statement of Work
SRC	System Review Criteria
TPGSI	TurningPoint Global Solutions

7.3 Appendix C: Glossary

The SI Project Glossary of project-specific terminology is maintained in the [Shared Resources](#) folder on the SI Contractor team site on SharePoint.

7.4 Appendix D: MECT Checklist

The following MECT Checklist items are attributable to this deliverable.

Table 4: MECT Checklist

Checklist ID	Requirement Text /System Review Criteria (SRC)	MITA Business Area Module Checklist Set	Business Process	Module Owner	CMS Guidance	Location
IA.DS.9	The system of interest complies with the SMA's standardized structure and vocabulary data for automated electronic intrastate interchanges and interoperability.	Information Architecture	Data Standards	SI	Evidence could be state's interoperability standards (R1), test reports for its usage (R2), and demonstration of the functionality (R3). Enterprise: Has standardized structure and vocabulary data standards. Show how they are being used by the modules. Module: Show use of the SMA's documented	Section 3.2
